

RNA binding
 chromosome/plasmid maintenance: abnormal
 colony sectoring: increased
 cytoskeleton organization
 mRNA processing
 chromosome/plasmid maintenance: decreased
 mitochondrial morphology: abnormal
 protein/peptide distribution: abnormal
 Spliceosome
 mitotic cell cycle

ATPase activity
 mitotic cell cycle
 chromosome segregation
 meiotic cell cycle
 organelle fission
 chromosome/plasmid maintenance: decreased
 innate thermotolerance: decreased
 cellular response to DNA damage stimulus
 cytokinesis
 cytoskeleton organization
